phc2d model architecture atlas: live registry overview

27 registered identities grouped by prediction contract. Component-attribution identities are models; inverse recipes and adapted PINO are shown separately.

Fixed full-band / pilot (8)

mlp
rho_wedge -> Wh [31x10]

res_mlp
rho_wedge -> Wh [5x3]

res_mlp_wide
rho_wedge -> Wh [31x10]

pod_res_mlp
rho_wedge -> Wh [5x3]

lifted_cnn
epsilon_grid -> Wh [5x3]

fno_lite
epsilon_grid -> Wh [5x3]

fno2d_band
epsilon_grid -> Wh [5x3]

fno2d_band_v2
epsilon_grid -> Wh [81x10]

Continuous query (5)

mlp_query
epsilon_grid+query -> band_query [3]

deep_onet_query
epsilon_grid+query -> band_query [3]

deep_onet_query_v2
epsilon_grid+query -> band_query [10]

fno2d_query
epsilon_grid+query -> band_query [3]

fno2d_query_v2
epsilon_grid+query -> band_query [10]

TE field (4)

unet_field
epsilon_grid+field_context -> field_eigen_te [dynamic]

unet_field_v2
epsilon_periodic_grid+field_context -> active_te_field_eigen [dynamic]

fno_field
epsilon_grid+field_context -> field_eigen_te [dynamic]

fno_field_v2
epsilon_periodic_grid+field_context -> active_te_field_eigen [dynamic]

Full-cell upgrades (6)

mlp_mixer_band_v1
material_weight_grid -> Wh [81x10]

res_mlp_gated_v2
material_weight_grid -> Wh [81x10]

convnext_band_v1
material_weight_grid -> Wh [81x10]

tfno2d_band_v3
material_weight_grid -> Wh [81x10]

dual_lane_band_operator_v1
material_weight_grid+lane -> Wh [81x10]

global_local_band_operator_v1
material_weight_grid -> Wh [81x10]

Component-attribution identities (4)

fno2d_band_component_v1
material_weight_grid -> Wh [81x10]

tfno2d_band_component_v1
material_weight_grid -> Wh [81x10]

convnext_band_component_v1
material_weight_grid -> Wh [81x10]

dual_lane_band_component_v1
material_weight_grid+lane -> Wh [81x10]

Dashed = registered placeholder. Pink = latest EXP-FWD-020 architecture; implemented, not authorized for training, and has no performance evidence.
