
Band predictions and MPB references: a scalar Bragg prior locates a region, not a band structure
a
Binary held-out test | index 8293 | MRE 0.56%
MPB target
Surrogate prediction
b
Graded held-out test | index 7510 | MRE 0.16%
MPB target
Surrogate prediction
Normalized frequency ωa/(2πc)
Wave vector
Γ
X
M
Γ
c
Binary validation | index 89 | prior error 12.88%
MPB bands (9x9 grid)
Locally refined B1-B2 overlap
Refined B1-B2 midpoint
Formula x = 1/(2n_eff)
B1-B2 signed width
-0.0695 (pseudo-gap)
d
Binary validation | index 96 | prior error 14.89%
B1-B2 signed width
-0.0574 (pseudo-gap)
e
Graded validation | index 62 | prior error 6.73%
B1-B2 signed width
-0.0515 (pseudo-gap)
f
Graded validation | index 337 | prior error 11.24%
B1-B2 signed width
-0.0684 (pseudo-gap)
