phc2d architecture poster: 27 registered models + inverse generators

Paper-style map of the main computational motifs; each family is expanded in the following atlas figures.

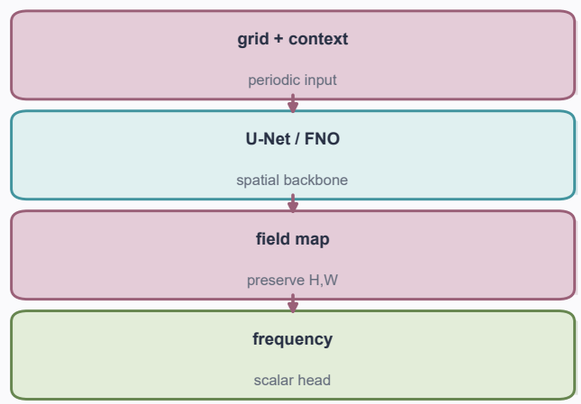

1 | Fixed Full-Wh (8)

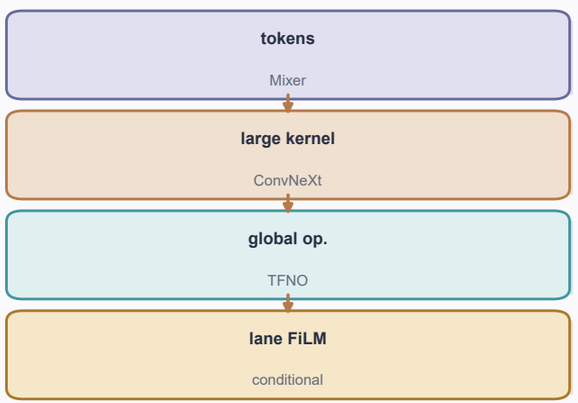

2 | Continuous query (5)

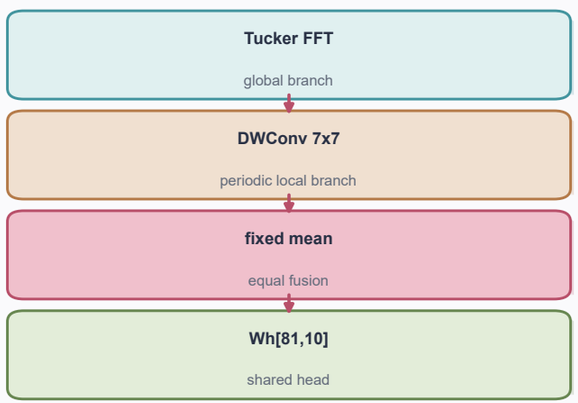

3 | TE field (4)

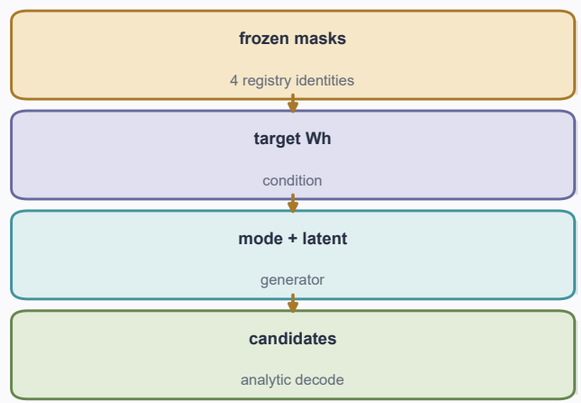

4 | Full-cell upgrades (5)

5 | Global-local bridge (1)

6 | Attribution + inverse

Color key: violet = vector/baseline | cyan = global operator | peach = local mixing | rose = fields/latest bridge | green = outputs
